

2023 Half-Year Results

Harbour Energy plc

Disclaimer

This presentation contains forward-looking statements, including in relation to the financial condition of the Harbour group (the "Group") and the results of operations and businesses of the Group. Forward-looking statements are sometimes, but not always, identified by their use of a date in the future or such words and words of similar meaning as "ambition", "anticipates", "aspire", "aims", "due", "could", "may", "will", "should", "expects", "believes", "intends", "plans", "potential", "targets", "goal" or "estimates". Although the Group believes that the expectations reflected in such forward-looking statements are reasonable, these statements are not guarantees of future performance and are subject to a number of risks and uncertainties and actual results, performance and events could differ materially from those currently being anticipated, expressed or implied in such forward-looking statements. Factors which may cause future outcomes to differ from those foreseen in forward-looking statements include, but are not limited to, those identified in the "Risks and Uncertainties" section of the Group's Annual Results. Forward-looking statements contained in this presentation speak only as of the date of preparation of this presentation and have not been audited or otherwise independently verified. Past performance should not be taken as an indication or guarantee of future results and no representation or warranty, express or implied, is made regarding future performance. The Group therefore cautions against placing undue reliance on any forward-looking statements. Nothing in this presentation should be construed as a profit forecast.

Statements in this presentation reflect the knowledge and information available at the time of its preparation. Except as required by any applicable law or regulation, the Group expressly disclaims any obligation or undertaking, including to release publicly any updates or revisions to any statements contained in this presentation to reflect any change in the Group's expectations or any change in events, conditions or circumstances on which any such statement is based.

This presentation does not constitute or form part of any offer or invitation to purchase any securities of any person nor any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any such securities, nor shall it or any part of it, or the fact of its distribution, form the basis of, or be relied on in connection with, any contract or commitment or investment decisions relating thereto, nor does it constitute a recommendation regarding any securities.

Agenda

1. H1 2023 Highlights
2. Operational review
3. Organic growth and diversification
4. Financial review and 2023 guidance
5. Concluding remarks

H1 2023 Highlights

Delivering our strategy

H1 2023 Highlights

Delivering our strategy of building a global diversified oil and gas company

Maximising the value of our production base

- A safe and responsible operator
- Robust performance from our operated UK hubs
- Active management of our cost structure
- High return, short cycle drilling opportunities progressed

Good momentum on organic growth and diversification projects

- Mexico: Zama UDP approved; oil discovery at Kan
- Indonesia: Multi-well exploration campaign to commence in October
- UK CCS projects Viking and Acorn awarded Track 2 status

Strong financial position and disciplined capital allocation

- Significant free cash flow generation
- Net debt reduced to zero
- Material shareholder distributions
- Optionality for value-accretive, meaningful M&A

196 kboepd

H1 2023
production

\$15/boe

H1 2023 unit
operating cost

c.\$250m¹

shareholder distributions
made in H1 2023

Zero

Net debt
(30 June 2023)

¹This comprises: the 2022 final dividend of c.\$100m paid in May 2023; c.\$40m of the 2022 \$100m buyback executed in Q1 2023; and c. \$110m of the 2023 \$200m buyback executed in H1 2023.

Operational review

Maximising the value of our production base

A focus on safe and responsible operations

Safety is our top priority

- Building a strong safety record and culture
- No significant injuries or process safety events
- Significant reduction in high potential incidents

Strong occupational safety record

TRIR (per million hours worked)¹

Improved process safety performance

Events (Tier 1 and Tier 2)¹

Playing a key role in the energy transition

- Committed to halving our emissions by 2030² and net zero by 2035
- Using our skills, experience and infrastructure to deliver CCS
- Responsibly decommissioning O&G infrastructure

Energy transition spend³

\$m

Emissions

GHGi (kg/boe)¹ Emissions (kt CO₂e)¹

¹ Safety, emissions and GHG KPIs are reported on a gross operated basis. Appointed operator assets Catcher and Tolmount are included in our safety KPIs but excluded from our emissions and GHG KPIs.

² This is against a 2018 baseline. ³ Energy transition spend includes decommissioning, CCS and emission reduction projects.

A robust production performance...

... underpinned by a diverse, cash generative production base with a good balance of oil and gas

Production

kboepd

UK Production

Strong performance from operated hubs

Increased gas production

¹This includes a full year's contribution from Vietnam. In August, we agreed the sale of our Vietnam business and are targeting completion by year-end 2023.

A proactive operator with competitive operations in the UK

Active management of cost structure to protect margins and ensure a sustainable and competitive business

Efficiency

Reliable operations, especially at operated J-Area, GBA & Catcher hubs

Operating efficiency¹ Production efficiency¹

77%

average UK production efficiency (2020-2022)²

Cost base

- Leveraging operational control and scale to drive cost savings, including in our supply chain
- UK organisation review expected to deliver annual savings of c.\$50m from 2024
- Optimisation of decommissioning activities
- Capital and resources focused on investment opportunities aligned with our strategy

3 strategic partnerships

formed with our key contractors in the UK in 2023

UK operating costs

c.\$18/boe

average UKCS operating cost (2020-2022)³

¹ Production efficiency includes impact of losses from planned shutdowns, operating efficiency excludes losses from planned shutdowns. ² Source: NSTA. ³ Source: NSTA (2020 & 2021) and WoodMac (2022).

Maximising value of our UK portfolio through targeted investment...

... and realising the upside of our existing assets to support production and cash flow generation

Track record of adding reserves

Shell/Conoco UK acquisitions

mmboe

■ 2P reserves ■ Cumulative production¹

Proactive operatorship

- Production acceleration activities
- Improving uptime, cost structure
- Third party business to extend producing life

Six operated UK hubs

accounting for c.70% of our UK production

Converting resources into reserves

- Near-field satellite tie-backs
- Collaboration with other operators e.g. Leverett
- Clustering small discoveries

204 mmboe

of UK 2C resource at year-end 2022

Potential to improve recovery

- Infill drilling and well interventions
- Application of production technology
- Secondary recovery (water injection, gas lift)

200-300 mmboe

upside potential if recovery improved by 10% across operated hubs

Infrastructure led exploration

- Robust opportunities close to our hubs
- Low risk, high return, quick payback
- E.g. Jocelyn South (J-Area), Gilderoy (GBA)

5 exploration wells

planned across UK/Norway in Q3 2023-Q1 2024

¹ Cumulative production is total production from acquisition effective date to year-end 2022.

2023 drilling programme is H2 weighted

Converting UK 2P reserves into production and targeting significant resource additions internationally

2023										Q1 2024

 ■ E&A
 ■ P&A
 ■ Partner-operated EPL-related deferrals
 → Rig arrival delays

Talbot: 1st of 3 development wells successfully completed

Organic growth and diversification

| Growing portfolio of strategic investment opportunities

Growing portfolio of strategic investment opportunities

... provide the potential to significantly diversify our business

Our projects in Mexico and Indonesia have the potential to materially increase our reserves life

Indicative reserve additions¹

Mexico

c.100 mmboe 2C¹

Zama

- 12% non-operated interest
- FDP approved by regulator
- FEED to commence shortly ahead of potential FID in 2024

Kan oil discovery

- 30% non-operated interest
- Appraisal planning underway

Indonesia

c.140 mmboe 2C¹

Tuna

- 50% operated interest
- Initial FDP approved
- Working with partner to enable FEED to commence

Andaman II

- Play opening Timpan-1 gas discovery
- Follow up drilling to start in H2 2023

Good momentum on our UK CCS projects which could provide a stable, long term income stream

Viking CCS

- 60% operated interest, partnered with bp
- One of largest planned CCS projects globally
- Progressing to FEED following Track 2 award

Acorn

- 30% non-operated partner in Acorn
- Targeting 5 mtpa CO₂ by 2030

c.300 mt 2C²

¹ Net to Harbour's working interest as at year-end 2022. The c.100 mmboe of 2C resource in Mexico does not include Kan which was a discovery in H1 2023. Indonesia 2C resource includes Natuna Sea Block A 2C resource, Tuna and Timpan

² Gross contingent storage capacity associated with the Viking fields only.

Harbour-led Viking CCS awarded Track 2 status in July

Uniquely positioned to deploy skills and infrastructure to accelerate UK CCS

Viking is vital to the UK's capture target of 20-30 mtpa by 2030

- Award of Track 2 status allows Viking to move to FEED and due diligence with DESNZ¹ ahead of potential FID
- 300 mt gross contingent CO₂ storage independently audited
- Emitter agreements for up to 10 mtpa CO₂ by 2030 and 15 mtpa by 2035
- Through Associated British Ports, potential to access shipped emissions
- Partnership with bp enhances skills and experience
- LOGGS capacity at >30 mtpa is globally significant
- Potential to deliver a long term, stable income stream for Harbour

Viking is one of the largest planned CCS projects in the world²

Capture rate, mtpa

¹ Department of Energy Security and Net Zero. ² Source: IEA Projects Database

UK's 1st carbon storage licence round: Two new licences offered with potential to increase storage by more than 50%

Andaman Sea (Indonesia) campaign targeting multi-TCF of gas

Demonstrate commercial viability of Andaman II licence and test the extension of the play into South Andaman

- 2022 Timpan-1 gas discovery de-risked a potential multi-TCF gas play
- Four well campaign to start in October
- Drilling 2023/24; Harbour cost c.\$110 million¹
- Encouraging results from new 3D seismic acquisition across eastern part of Andaman II

Drilling campaign targets four additional prospects

Q4 2023
Layaran
S. Andaman

YE 2023
Halwa
Andaman II

H1 2024
Gayo
Andaman II

H2 2024
TBC
S. Andaman

Multi TCF
potential

¹ Success case for four wells, including full data acquisition and testing ² Circles proportional to annual natural gas consumption by country

Financial review and 2023 guidance

| Strong financial position and disciplined capital allocation

Greater flexibility around hedging strategy going forward

Materially higher exposure to commodity prices, especially UK NBP, with hedging volumes set to reduce from 2024

Hedging profile

Greater flexibility

with hedging requirements now linked to the amount drawn on the RBL; no requirements to hedge when <10% drawn

Income statement reflects strong underlying profitability...

...offset by period-specific, non-cash UK tax charges

\$ million	H1 2023	H1 2022
Revenue & other income	2,016	2,670 ●
Operating costs	(546)	(542)
DD&A	(728)	(762)
Other cost of sales ¹	50	(60)
Impairments & other expenses ²	(47)	(15)
G&A	(91)	(43)
Operating profit	654	1,247
Net financing costs	(140)	(117) ●
FX financing gain / (loss)	(85)	360 ●
Profit before tax	429	1,490
Tax	(437)	(506) ●
(Loss) / profit after tax	(8)	984
EPS (cents/share)	(1)	106
EBITDAX	1,428	2,024

- Revenue lower due to lower commodity prices, especially NBP, and lower oil volumes
- Increase in financing costs driven by accounting impact from the unwinding of the discount on our decommissioning provisions
- Net FX financing loss driven by the revaluation of GBP denominated balances on our balance sheet due to the strengthening pound against the US dollar

Tax

- Increase in effective tax rate to >100%, driven by the introduction of the EPL and period specific non-cash UK tax charges

Tax rate

¹ Other cost of sales is primarily composed of hydrocarbon inventory balances. ² Impairments and other expenses includes early project costs related to CCS, write off in respect of the 1x well in Mexico and impairments. ³ G&A costs include corporate overheads, depreciation of non-oil and gas assets, external consultants and redundancy provision.

Balance sheet significantly delevered and equity increased

Net cash balance sheet

Assets	30 June 2023 \$ million	YE 2022 \$ million	Equity and liabilities	30 June 2023 \$ million	YE 2022 \$ million
Goodwill	1,327	1,327	● Equity	1,414	1,021
Other intangible assets	955	880	● Borrowings	515	1,238
Property, Plant, Equipment	5,506	5,690	● Decommissioning provisions	4,291	4,141
Right-of-use assets	607	735	● Deferred tax liabilities	1,062	397
● Deferred tax asset	381	1,407	Lease liabilities	733	825
Other assets	1,555	2,027	● Derivative liabilities	1,254	3,451
Cash	494	500	Other liabilities	1,556	1,493
Total assets	10,825	12,566	Total equity and liabilities	10,825	12,566

- Reduction in borrowings reflects that we were undrawn on the RBL as at 30 June 2023
- Significant reduction in derivative liabilities reflects hedges realised during the period, the shift down in the forward curve and the strengthening of the UK pound sterling. This then had a corresponding impact on deferred tax which swings from a net asset to a net liability in the period.
- The increase in decommissioning provisions is mainly due to an increase in estimate for Solan, unwinding of the discount and strengthening of the pound offset by decommissioning spend in the period
- Increase in equity driven by reduction in unrealised derivative liabilities net of share buybacks and dividends

Robust financial position with significant cash generation...

... allowing for material shareholder distributions and targeted investment in our business

Free cash flow of \$1 billion

Net debt / cash flow

Significant liquidity

¹ The entity with the remaining 2022 EPL liability does not pay tax by instalments – due to that entity not paying CT/SCT because of tax losses – and will settle the 2022 EPL liability of \$260m in October 2023

Building on our track record of rapid net debt reduction post M&A...

...whilst delivering material shareholder distributions

Net debt

\$2.9 billion
of net debt reduction since April 2021

Shareholder distributions

\$1 billion
of total shareholder returns announced since December 2021

¹ 2023 FCF of \$1 billion does not include any proceeds from the sale of Harbour’s Vietnam business which is targeting completion by year-end 2023.

2023 Guidance

2023 guidance (as at January 2023)

Production

185-200 kboepd

Operating cost

c. \$16/boe²

Total capex

c. \$1.1 billion

H1 2023 (Actual)

Production

196 kboepd

Operating cost

\$15/boe

Total capex

\$0.4 billion

2023 guidance (as at August 2023)

2023 Production

185-195 kboepd¹

Operating cost

c. \$16/boe²

Total capex

c. \$1.0 billion

¹ This includes a full year's contribution from Vietnam. In August we agreed the sale of our Vietnam business and are targeting completion by year-end 2023.

² Original opex guidance reflects \$1.2/£ FX rate. Updated opex guidance as at August 2023 reflects a higher sterling exchange rate of \$1.25/£.

Concluding remarks

| Well positioned for value creation

A pure play upstream global oil & gas producer

Safe and responsible operations

Playing a significant role in the energy transition

High quality, cash generative portfolio

Targeting high return, short cycle drilling opportunities

Portfolio of strategic investment opportunities

Organic diversification well underway

Robust financial position, strict capital discipline

Supports competitive shareholder returns and M&A optionality
